EDUCATION

Indian Institute of Information Technology, Bhopal

Bachelor of Technology in Computer Science (CGPA-7.8)

June 2021 – June 2025

Datia, Madhya Pradesh

EXPERIENCE

CodeStax.ai | *SDE intern*

February 2026 – Present

Onsite (6 months)

- Developed and maintained frontend features using Vue.js. Built RESTful APIs and backend logic using Node.js.
- Worked with AWS for database integration and deployment.
- Collaborated with the team to debug issues and improve application performance.

Geeksforgeeks | *SDE + DSA instructor*

October 2025 – January 2026

Hybrid (4 months)

- Taught Data Structures Algorithms concepts (arrays, trees, graphs, DP) to students.
- Conducted coding sessions and problem-solving workshops for interview preparation.
- Mentored learners to improve coding skills and crack technical interviews.

ACHIEVEMENTS

- **Expert (Max Rating - 1645) on Codeforces, Knight (Max Rating - 2024) on LeetCode, 4 Star (Max Rating - 1878) on CodeChef.**
- Accomplished **Global Rank 972** among 60,000+ participants in **Codeforces Round 1029 (Div. 3)**. [\[Link\]](#)
- Achieved **Global Rank 530** among 24,000+ participants in **Codeforces Round 1034 (Div. 2)**. [\[Link\]](#)
- Attained **Global Rank 344** among 23,596 participants in **Leetcode Biweekly Contest 145**. [\[Link\]](#)
- Attained **Global Rank 18** in **CodeChef Starters 241**. [\[Link\]](#)

PROJECTS

Multithreaded Web Server | *Java ,Multithreading ,Concurrency ,Sockets , TCP/IP ,Thread Pool*

GitHub

- Built a Java socket server in three concurrency variants — single-threaded, thread-per-client, and ExecutorService thread pool — illustrating real-world trade-offs between simplicity, throughput, and resource safety.
- Implemented a 100-thread concurrent client for load testing, and applied `setSoTimeout` and `try-with-resources` to ensure robust connection lifecycle management across all variants.
- Demonstrated core backend engineering concepts: thread scheduling, bounded concurrency, and functional dispatch with `Consumer<Socket>` lambdas.

Audio Transcriber | *Java 17 ,Spring Boot 3.3.3 ,Spring AI ,OpenAI Whisper API ,REST API*

GitHub

- Designed and implemented a RESTful API with Spring Boot 3.3.3 to accept multipart audio file uploads and stream transcriptions using OpenAI Whisper (whisper-1) via the Spring AI abstraction layer.
- Integrated Spring AI's `OpenAiAudioTranscriptionModel` to configure transcription options (language, temperature, response format), reducing setup boilerplate and enabling clean, testable AI service wiring.
- Built a responsive React 18 + Vite frontend with Axios for async file upload and live transcription result rendering, delivering a smooth single-page experience.

Real Time Chat Application | *React.js, Node.js, MongoDB, Express.js, WebSocket, Socket.IO*

Live GitHub

- Built a MERN stack app with real-time messaging for 500+ users using Socket.io, JWT, and Google OAuth for reliable authentication
- Implemented **WebSockets** for instant, connection-based notifications to replace polling, and secured the system using **Google OAuth**.
- Designed a responsive interface, ensuring seamless usability across devices and screen sizes

TECHNICAL SKILLS

Programming Languages: C++,Java, Spring boot, Python, HTML, CSS, JavaScript.

Web Development: Vite, Javascript, TypeScript, Express.js, React, Next.js.

Tools: Git, GitHub, Postman, Vercel, Render.

Databases and Infrastructure: PostgreSQL, MongoDB, AWS, Git.
